- 2017** acquisition of anodizing facility - **ACL Anodizing**

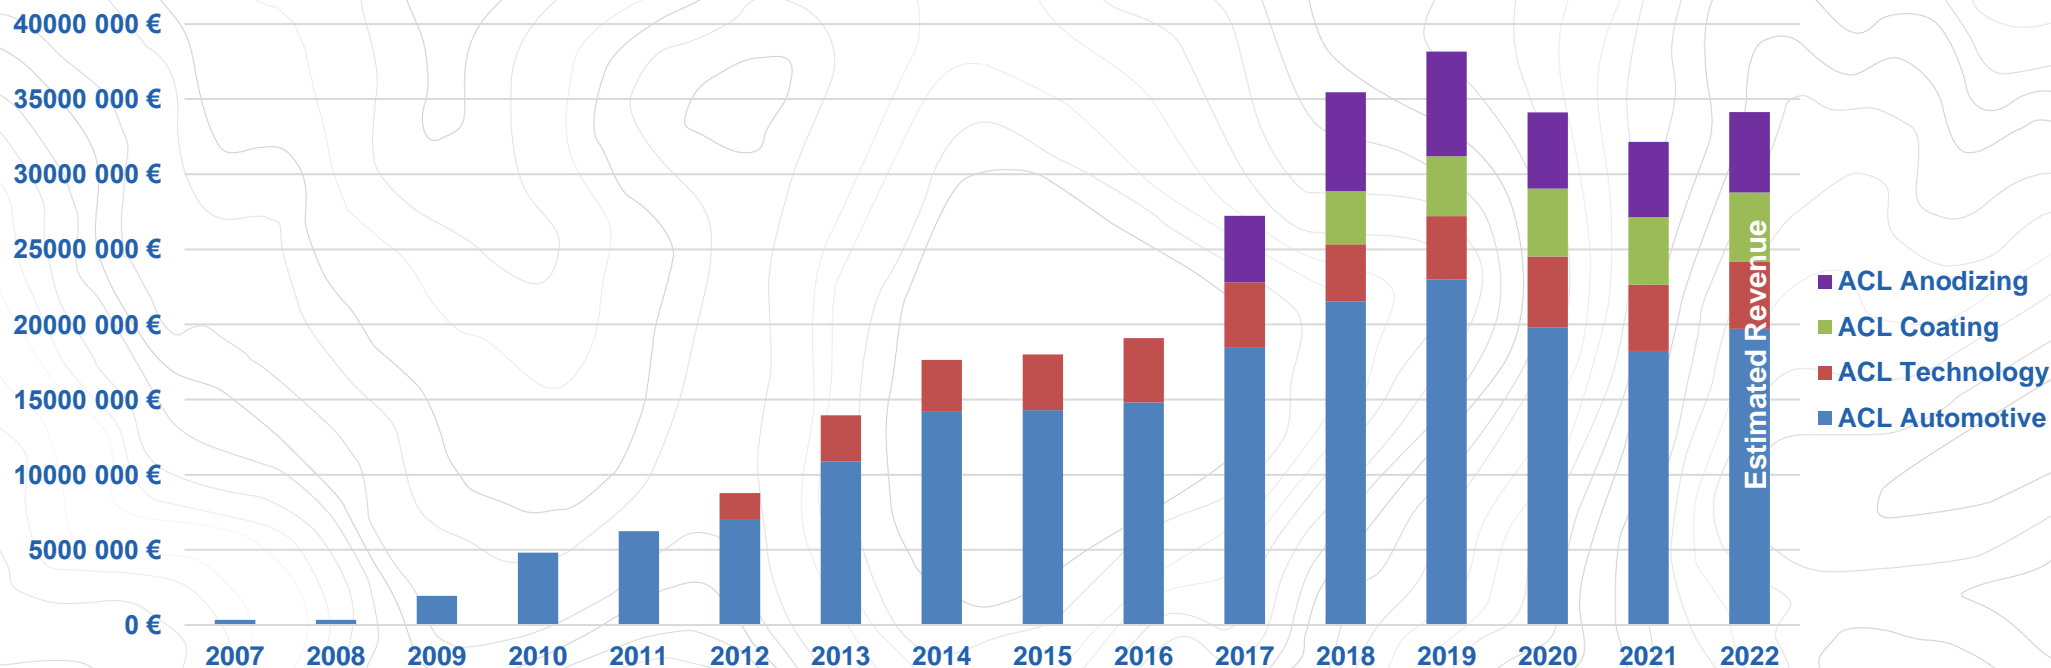

## MARKET POSITION

### Number of employees

## MARKET POSITION

### Group members' Revenue

## AUTOMOTIVE

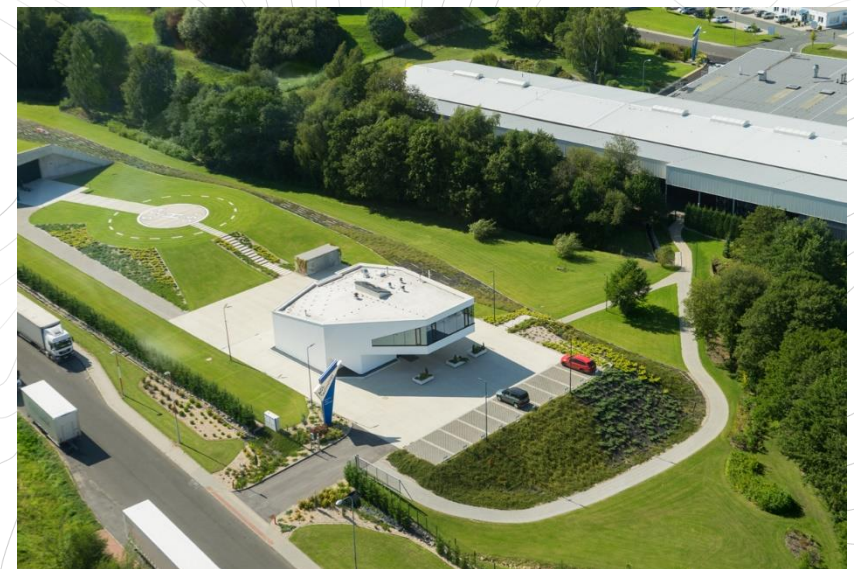

- **ACL Automotive** was founded in 2006
- since the very beginning, the company has defined itself as a development supplier with its own issued and pending patents for roof systems
- we are specialized in the production of roof rails
- our premises (manufacturing, paint-shop, research headquarters) is located in the center of the Liberec Industrial Zone – South
- we have built a new assembly plant in Solnice, near the Škoda plant (500m)

## TECHNOLOGY

- **ACL Technology** was founded in 2012
- it is a modern development center, focused on the development of new projects and development tests, custom work, reverse engineering and more
- the company also deals with highly specialized custom work (e.g., parts for vintage/classic cars) and reverse engineering

## COATING

- **ACL Coating** was founded in 2001.
- it specializes in providing comprehensive surface and powder coating services with one or two-layer varnish of the highest quality on a fully automated line for large-scale and mass production
- our premises is located in the center of the Liberec Industrial Zone – South

## ANODIZING

- **ACL** Anodizing deals with the surface treatment of aluminum and its alloys by anodic oxidation - anodizing
- anodizing aluminum and alloys has been dedicated to our company since 2005 and is one of just a few companies that is capable of achieving the high demands of both technical and decorative finish
- the headquarters of **ACL** Anodizing is located in Jablonec nad Nisou
